

Get Ready for Spring the Right (of Way) Way

Look Up, Look Down

Trees are a vital part of any rural or urban setting's quality of life. If you are getting ready to plant trees, bushes or shrubs, look around to see where overhead power lines may hinder future growth.

Call Klickitat PUD for assistance on tree selection and placement. Remember, a 2-foot-tall fir seedling can grow to more than 100-feet tall and 30- to 50-feet wide.

After you look up, look down for underground service. Never assume underground utility lines are buried deeper than you plan to dig. In some cases, utility lines are very close to the surface.

Landscaping and planting to hide underground utilities makes the equipment hard to find. This makes outages last longer and is unsafe for workers.

Underground utility locating is free. There is no reason not to call. 811 is the new national number to call for line-locating requests. Washington state law allows utilities three days to respond to your request, so planning ahead is best.

Right-of-Way Maintenance is Year-Round

Trees growing near power lines can be a safety hazard and a major cause of power outages.

According to the Revised Code of Washington, any time a potential threat exists that could cause damage to electric facilities from trees and vegetation, an electric utility is required to remove the hazard. With growth rates of 8 to 10 feet a year on some species, it is a full-time job just staying ahead of annual growth.

If there are trees in the KPUD right of way, call to discuss your options. Limbs and trees within 10 feet of distribution electrical lines and 23 feet of transmission lines are cut back. This helps ensure reliable electric service, and is done at no cost to you. See the graphic on page 29 for planting specifications.

Right-of-way easements grant KPUD the authority to trim trees without property-owner permission to provide for a safe and reliable electric system. However, KPUD respects the property of its customer-owners and, in most cases, notifies the property owner of the need for tree work before trimming is done. In unusual or emergency situations, it may be necessary to trim trees without first notifying the property owner to restore service or eliminate safety hazards.

The extent of trimming required is determined by the tree's growth rate, the movement of trees and conductors in bad

weather, and the voltage of the lines. KPUD employs a professional tree-trimming crew that includes a certified arborist, Foreman Dale Stelter. Dale also helps determine if the tree is diseased, dead or dying and, depending on the proximity of the tree to electric facilities, if removal of the tree is required.

Could You Get There?

What do an accessible right of way and your lights being on faster in an outage have in common? They are related because most tree-related outage times can be greatly reduced if the right of way is clear of trees and brush. Brush and trees inhibit visual inspections, and vehicle and foot traffic.

When is the last time you walked the right of way on your property? Are all of the poles easily accessible?

KPUD can field check your situation, let you know when our maintenance crews will be in your area, and make suggestions for clearing and maintaining your right of way.

Safe Logging Saves Lives!

If Klickitat PUD power lines are near your harvest area, please call for consultation. Options are available to help you work safely and keep the lights on.

Only people qualified to work near energized conductors should work around power lines.

Slash should not be piled and burned on power line rights of way. When replanting, observe dedicated easements and rights of way on the property.

Don't plant in these areas. Tall-growing trees will be cut down in the next maintenance cycle. ■

On the Schedule

Trimming in 2013 is in the Snowden and Appleton areas in the west end of the county.

This summer, there will be tree-trimming maintenance to remove trees that were damaged in the Highway 141 fire in the White Salmon area, and the Brooks Park area on Highway 97.

COMMUNITY CALENDAR

April

Every Saturday—Open roller skating at Cascade Locks School gym, 6 to 8 p.m. For more information, call (541) 806-3045.

5—Community Swing Dance, 7 to 9 p.m., United Methodist Church, Goldendale

5-7—Annual Portland Swap Meet, Portland Expo Center

9—Klickitat PUD Commission Meeting, 2 p.m., Goldendale office

9—Klickitat PUD customer meeting, 7 p.m., Roosevelt School

9-10—Grange Mini Fair, Goldendale Grange Hall, E. Darland Street. For more information, call (509) 773-9122.

11—Relay For Life Kick-off party, 6 to 8 p.m., Goldendale Middle School
13-28—59th Annual Hood River Valley Blossom Time and Festival

16—Klickitat PUD customer meeting, 7 p.m., Glenwood Grange

19-21—Goldendale Home & Garden Show, Klickitat County Fairgrounds

19-21—Apple Valley Blossom Festival Dessert Party & BBQ, 2363 Tucker Road, Hood River

20—Portland's Largest Garage Sale, Expo Center, Portland

20—Trout Lake Run/Walk: Half Marathon, 10K, 5K. For more information, call (509) 395-2065.

20-21—Blossom Craft Show, 10 a.m. to 5 p.m., Hood River County Fairgrounds

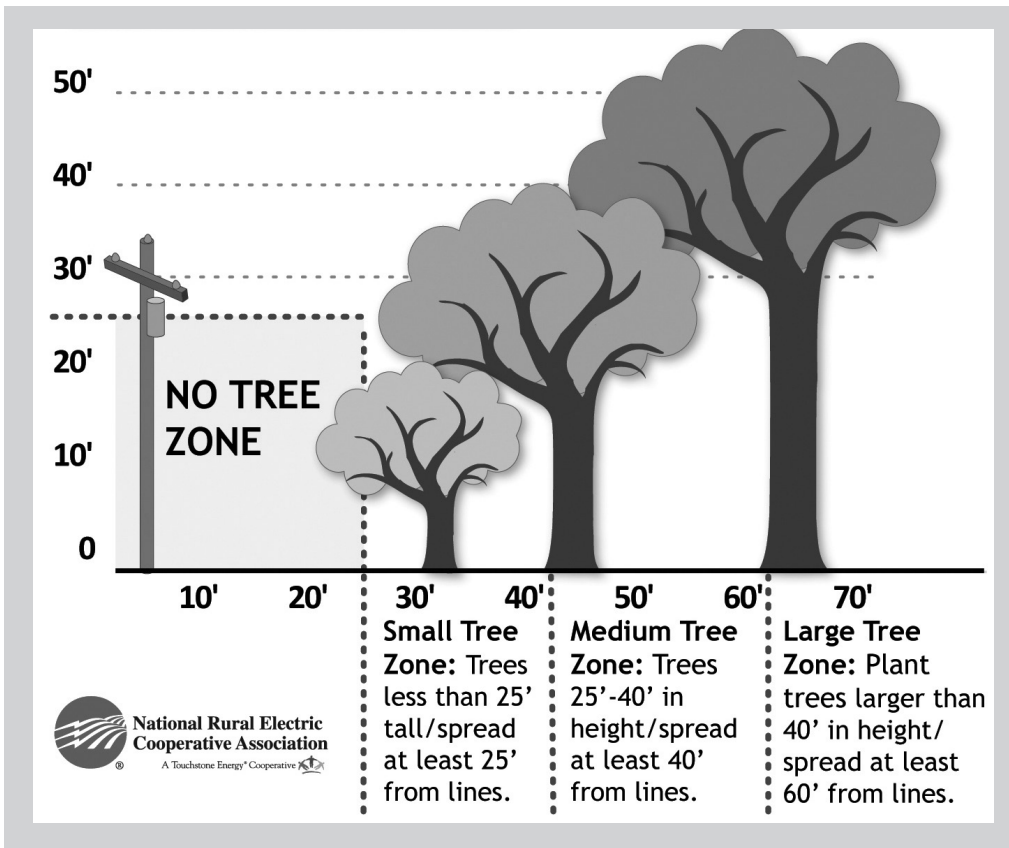

23—Klickitat PUD Commission Meeting, 2 p.m., Goldendale office

23—Klickitat PUD customer meeting, 6 p.m., Svendsens' House, Rimrock

26-28—Community Pride Clean-up Event, White Salmon-Bingen. For more information, call (509) 493-2961.

27—Cherry Festival Run: 10K, 5K, 3K, The Dalles. For more information, call (541) 298-1119.

27—Fire Victims Auction and Yard Sale, 10 a.m., Rural 7 Firehall, 327 W. Brooks, Goldendale. For more information, call (509) 773-4246.

Be Power Friendly When Planting Trees

Trees beautify homes and property, but care should be taken when planting trees near power lines.

Each year, power outages are caused by storms that bring down trees or limbs on lines.

You can help minimize outages by taking a

power-friendly approach to landscaping. Avoid planting trees under power lines.

If you are planting within 30 feet of a power line, plant trees that will grow no higher than 25 feet. Larger trees should be planted more than 30 feet from lines. ■

KPUD Holds Annual Customer Meetings

During the next few months, Klickitat PUD staff and commissioners will visit city councils and community groups throughout Klickitat County.

The upcoming schedule is:

- April 9—Roosevelt Community Council, 7 p.m. at Roosevelt School
- April 16—Glenwood Community Council, 7 p.m. at Glenwood Grange
- April 23—Rimrock Homeowners Association, 6 p.m. at the Svendsens' house
