

The consumer (Customer) shall furnish and own all facilities beyond the point of service including the meter base. The Customer should contact the District's Staking Engineers before beginning construction or revising an electric service. Any changes that are required on work that was performed before the consultation will be paid by the customer. The Customer may elect to install the underground secondary service installation and/or provide all the trenching. The District will provide the specifications for these.

The Customer shall obtain an Electrical Permit and have the meter base inspected before the District will make their connection. **Washington State Dept. of Labor and Industries – 360-896-2318** or www.lni.wa.gov

If the Customer is providing the trench they are responsible for submitting the underground locate request two days prior to any digging. **Call Before You Dig - 1-800-424-5555.**

The Customer is also responsible for providing any Right-of-Way clearing. i.e. trees, undergrowth, etc.

All of these items are clearly defined in this section under the individual types of work that you want to complete.
