

Glenwood Water Use Efficiency Program

Klickitat PUD 2024

WUE Program Goals and Measures

Water system owners, managers, and operators work hard to provide safe and reliable drinking water to their customers. However, working to protect this natural resource is everyone's responsibility.

The Water Use Efficiency Program was created by Washington Law, as a plan for each water system to implement water saving activities. Part of the plan requirements are to adopt customer goals.

In 2022 KPUD Board of Commissioners approved new Water Use Efficiency Goals for each community. The **Glenwood** Water System WUE goal adopted from 2022-2028 encourages water consumption to 375 gallons per day (gpd) per connection.

There are many ways to conserve water both inside and outside the home.

Caring for Nine Rural Water & Six Waste Water Systems throughout Klickitat County

Water-Saving tips from:
ecomena.org/water-conservation

- Water your yard and outdoor plants early or late in the day to reduce evaporation.** (Illustration: A person watering a lawn with a hose, with a rainbow and 'YES!' above and 'NO!' below.)
- Use a shut-off nozzle on your hose.** (Illustration: A yellow hose with a shut-off nozzle.)
- Use plants that require less water.** (Illustration: A bush of purple flowers.)
- Mulch around plants to hold water in the soil.** (Illustration: A hand placing mulch around a plant.)
- Get an Energy Star labeled washing machine.** (Illustration: A washing machine with an 'Energy Star' label.)
- Use a low flow showerhead.** (Illustration: A showerhead with water spraying.)
- Wash only full loads.** (Illustration: A washing machine drum.)
- Take shorter showers — five minutes or less is best.** (Illustration: A person taking a shower with bubbles.)
- Turn off the water while soaping hands and brushing teeth.** (Illustration: A person brushing teeth at a sink with a 'OFF' sign.)
- Turn off sink faucet while scrubbing dishes and pots.** (Illustration: A person scrubbing dishes at a sink.)
- Install new toilets that use less than 1.6 gallons per flush.** (Illustration: A toilet.)
- Put faucet aerators on sink faucets.** (Illustration: A faucet with an aerator being inserted.)
- Use a broom, not a hose, to clean driveways and walkways.** (Illustration: A broom and a hand spraying water.)
