Plan Ahead For Your New Electrical Services

Are you in the process of planning a new project that will require electrical services?

New electrical service requests are running two to three weeks out once a customer is placed on the construction schedule.

What you need to do

- 1) Contact the Klickitat PUD Engineering Department to schedule an appointment.
- 2) Provide state electrical inspector approval of your electrical service.
- 3) Make payment for line extension costs, as determined by KPUD.
- 4) Provide signed and notarized easement(s) if required.

Within a week of completing the above tasks, you should be placed on the construction schedule. Service installation will proceed in about three weeks.

KPUD encourages you to plan ahead and coordinate your electrical installation projects with us as soon as possible.
