

# Public Utility District No. 1 of Klickitat County

80 Years of Service \* 1938-2018

## GENERAL MANAGER'S REPORT TO THE BOARD For the **March 22, 2022** Meeting

### **AGENDA ITEMS:**

- A. Fire Mitigation Plan update 3:30 p.m. - Mark Garner and Scott Lindsay of Brown and Kysar Inc. will present the Wildfire Risk Mitigation Plan for discussion. No action is being requested at this meeting.
- B. Prequalification of Professional Services Consultants - Brandon Johnson is asking for approval for the addition of three renewing firms to be added to the Professional Services roster for the 2022 period.

### **NON-AGENDA ITEMS:**

1. Community/GSD Microgrid - Johnathon Lewis from Klickitat Valley Health will be on site to discuss the status of their infrastructure projects. They include a new 350 kW diesel generation unit, a 100 kW fuel cell, 1 MW of 4 hour battery backup and potentially a net metered project or a community solar project. They are also completing a feasibility study for a microgrid that could include pooling back up generation for Klickitat Valley Health and the Goldendale schools. Our involvement is limited to smart metering and potentially dispatching the battery storage, although first blush, it would be difficult to for the PUD to utilize it for economic gain.
2. Inactive Account letters - as discussed last meeting, letters are being sent out beginning 03/16/2022 to twenty account holders with services that have been inactive for a minimum of three years.
