

## Leave the Tree Trimming to Us

You love those beautiful old trees that have been in your yard for generations. But when they start growing too close to the power lines and knock out the electricity, they are inconvenient and dangerous!

Call Klickitat PUD at (509) 773-5891 or (800) 548-8357 toll free if your trees are getting dangerously close to power lines.

Cutting branches near an overhead line is NOT for do-it-yourselfers. Klickitat PUD crews are trained to work safely around live power lines, and know how to preserve the health and beauty of your trees. ■

## Call Before You Dig ... And Dig Safely!

If you are planning a major construction project or landscaping your yard, stay clear of underground utilities.

Call the Northwest Utility Notification Center at (800) 424-5555 at least 48 hours before digging or excavating.

The center will contact the appropriate utilities in Klickitat County for you.

When calling, be prepared to give the following information: your telephone number, type of work you will be doing, the start date, county,

city, job location, nearest cross street and special marking instructions, if required.

Utility representatives will respond and mark the locations of your underground utilities. This will eliminate digging equipment from hitting or cutting off power, water, phone, cable or gas lines.

Accidental contact with any of these lines can result in serious injuries or worse.

“Call before you dig” is a free service that can prevent dangerous and costly accidents. ■
