Alert Motorists Help KPUD Crews

If power outages occur during bad weather conditions, you can depend on your Klickitat PUD crews to serve you, our friends and neighbors.

Crews work at all hours in all parts of the county when it's wet, foggy, snowy, cold, dark and miserable. Driving conditions can be bad and visibility poor.

Please watch for our utility workers along the roads, yield if necessary, drive carefully and have a safe winter season!

Downed Lines are Dangerous

Always assume all power lines are energized and dangerous. Lines that are de-energized could become energized at any time. Never touch a downed power line—and never touch a person or object that is touching a power line. Follow these tips to stay safe around a downed power line:

- Immediately report a downed power line to KPUD at one of the numbers below and call 911.
- If a power line falls across or near your vehicle while you are in it, stay inside until help arrives. If you must exit, jump clear so no part of your body is touching the car when you land. Keep both feet together and shuffle or hop at least 30 feet away from the vehicle.
- Do not try to move tree limbs that are on or near a power line.
