

# **Residential Heat Pump Water Heater Rebate Program Participation Requirements and Instructions**

Thank you for your interest in our Residential Heat Pump Water Heater Energy Efficiency Program. We are pleased that we have the opportunity to offer this service to you through our association with Bonneville Power. Because of this collaboration of funds, the information we collect from you is required to help determine your eligibility and may also be used to evaluate and audit data about energy use and the conservation program as a whole. With that, your information may be requested for certain site visits to evaluate the performance of the program and is to be kept available for three years. No personal information will be issued to the public.

## **PROGRAM REQUIREMENTS**

All residential Heat Pump Water Heater measures must be installed according to KPUD, BPA, and manufacturer standards & specifications. KPUD reserves the right to make changes to all programs and rebates are subject to the availability of funds through the Energy Efficiency Program.

Most Heat Pump Water Heaters (HPWH's) can be self-installed. However, if you choose to use a contractor they must comply with KPUD specifications and requirements as each measure may require special forms and procedures to be followed.

### **Unitary Heat Pump Water Heaters**

Unitary HPWH combine a tank and heat pump compressor in a single unit. The heat pump compressor harvests heat from the immediate space around it using a vapor compression cycle. HPWH's are at least twice as efficient than a standard electric resistance water heater.

#### **Requirements and Specifications:**

These measures are available for existing single-family homes, manufactured homes, and multifamily homes (ask for more detail). They are not available for new construction.

A maximum of one unitary HPWH rebate may be claimed per home. Accessory dwelling units with separate plumbing systems qualify for this rebate even if they are on the same electrical meter.

**Unitary HPWH's must be listed on KPUD's HPWH Qualified Products List. Visit [www.klickitatpud.com](http://www.klickitatpud.com)**

| <b>Heat Pump Water Heater Type</b>       | <b>Rebate</b> |
|--|---------------|
| Unitary HPWH 40 gallon                   | \$700         |
| Unitary HPWH Tier 3 -50 gallon and above | \$800         |
| Unitary HPWH Tier 4 -50 gallon and above | \$900         |

### **Split-System Heat Pump Water Heaters: Rebate: \$1100**

Split-system HPWH's have interior storage tanks and outdoor compressors installed outside the house. The heat pump compressor harvests heat from the immediate space around it using a vapor compression cycle. HPWH's are at least twice as efficient as a standard electric resistance water heater.

#### **Requirements and Specifications:**

This measures is available for existing single-family homes, manufactured homes, and multifamily homes (ask for more detail). They are not available for new construction.

A maximum of one split-system HPWH rebate may be claimed per home. Accessory dwelling units with separate plumbing systems qualify for this rebate even if they are on the same electrical meter.

Split-system HPWH's must be listed on KPUD's HPWH Qualified Products List. Visit [www.klickitatpud.com](http://www.klickitatpud.com)

## **Additional Information:**

Manufacturers' installation specifications may include:

- All water or refrigerant lines connecting the tank and outdoor units be insulated with minimum R-4;
- If domestic hot water pipes outdoors are freeze-protected with heat cable, the cable be installed per manufacturer's instructions, underneath the insulation, and be thermostatically controlled to prevent the tape from operating above 38 degrees Fahrenheit;
- No resistance heating is allowed (except heat tape for freeze protection); and
- The system plumbed with a thermal mixing valve, which is equipped with internal check valves on the hot and cold water lines connecting to it.

## **NOTICES AND DISCLAIMERS**

Low-income rebates may also be available. Contact KUD to learn more.

Kickbacks, rebates, non-authorized discounting of bids or other non-program benefits from the Contractors are prohibited, and may be subject to federal law. All materials and installations must comply with current KPUD/BPA conservation specifications in order to be eligible for funding.

Contractors, participating in the program shall not be considered officers, agents or employees of BPA or KPUD; therefore, KPUD shall not be liable for the tortuous acts or omissions of the Contractors or other independent contractors. All installations are subject to Quality Assurance oversight inspections by BPA approved Inspectors.
